Stewart A. Swerdlow

Dream Dictionary

Welcome to the online *Dream Dictionary*. This dictionary is intended to give general meaning to dream symbols and is being compiled from dreams that have been analyzed by Stewart.

Each of these general meanings is further refined by the situations of the dream and any specific colors, tones, or archetypes that are recognized. In other words, these meanings are only guidelines. The actual meaning of a dream is further refined by your own frequency and the frequency of the dream itself.

What this *Dream Dictionary* is NOT:

Comprehensive. It is not meant to list every possible dream symbol (that in itself, is infinite). It is not meant to give a concrete, final definition of a dream symbol - there is no such thing. The definitions shown here are generic and are further modified by the frequency of the dream and the frequency of the individual who dreams it.

What this *Dream Dictionary* is:

This online dictionary is a compilation of dream symbols from analyzed dreams that are submitted to Stewart for analyzing. Key symbols from those dreams will then be added to this online dictionary. This dictionary is intended only to supplement the symbols found in *The Healer's Handbook*.

Dream symbols and terminology appearing in the online *Dream Dictionary* will not be duplicates of the terms that are listed in *The Healer's Handbook* unless there is an opportunity to further refine the meaning of the symbol or term.
