The AO Scan Mobile device is not a medical device, it does not diagnose, treat, or cure any disease. The AO Scan Mobile device measures frequencies and then shows with detailed reports where those frequencies measure, in comparison to the research done on frequencies for optimal health.

RESEARCH AND DEVELOPMENT

AO Scan technology is based on Biophysics, or the research of measuring the frequencies of each individual part of the body. Overall research indicates that everything has a natural frequency (measured in megahertz), and that we are all affected by the frequencies around us. Medical researchers believe that the health of an organ, tissue, system or cell structure within the body can be identified by passing frequencies through the body, and by measuring the feedback frequency's resistance.

Expert research has been done on the relationship between frequency and disease. Every cell and organ in the body has its own distinctive Vibrational Frequency or Oscillation. When these oscillations are disrupted, whether by injury, diet, stress or emotion, it results in a disruption of that part of the body's biological function. When not addressed, it can bring about fatigue, depression, illness, disease and even death.

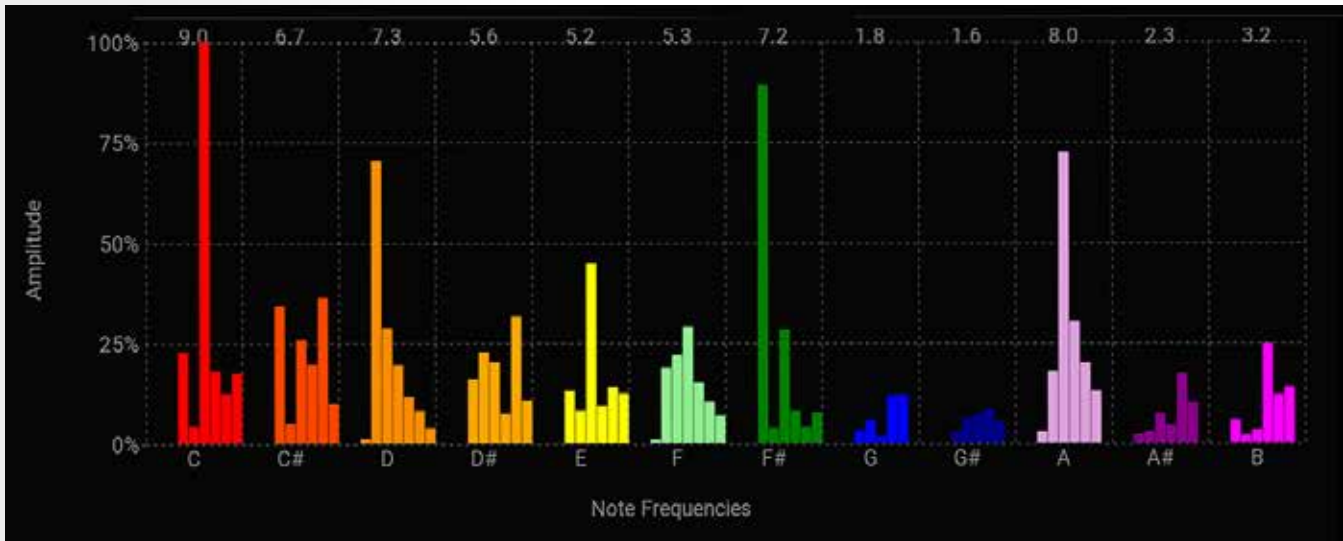

Over the past 20 years, more than 120,000 of these Vibrational Frequencies have been isolated, identified and cataloged. Knowing what the optimum frequencies of the cells and organs are, can assist in determining the root cause of an individual's health status. Frequencies for optimal health are compared to the individual's scanned results within the AO Scan software and Frequency Optimization is generated.

There are three techniques employed in AO Scan Mobile Software. The first is Bio Resonance Recognition. This process transmits a specific signal from the brain through the bone conduction headset and into the software system. This enables the software to work with the brain to identify which part of the body is being scanned.

The second process is Bio Resonance Comparison. In this process the software collects the feedback currencies of the resonating frequencies of the part of the body that was selected to be scanned. The software system compares the user's frequencies to the homeostatic frequency database. Then calculates the difference and assigns a number from 1 to 9, with 5 being the same as the optimal homeostatic frequencies in the database. 1 is measured as inactivity and 9 is measured as overactivity.

The last process is the Sympathetic Vibratory Physics treatment. The AO Scan Mobile software generates Optimal Frequencies that are meant to harmonize and balance out the user's own frequencies. These Optimal Frequencies should be listened to with headsets on and should be repeated until the user achieves homeostatic range with their next AO Scan.

INNER VOICE

SPANE otherwise known as The Scale of Positive and Negative Experience, measures the frequencies of positive and negative emotional states. It is comprised of two subscales, one for positive emotion and one for negative emotion with six adjectives each and assesses a broad range of emotions.

INNER-Voice Technology

The INNER-Voice program helps harmonize everyday life by improving concentration, creativity and emotional intelligence. This powerful tool allows you to analyze 5-15 seconds of a client's voice to determine the emotional state that they're in. After that, Sound Harmonizing tones are generated in the form of RAD Tones (Radionics) to support the balance of those emotions or mental states.

RAD Technology

First established in the early 1900s by the American Physician Albert Abrams, Radionics is a science founded on the idea that all living things have defined vibrational frequencies. Later development by George and Marjorie De Le Warr brought about the Oscillator. Further development was done to create the INNER-Voice technology that we use with our AO Scan software (shown in the graph above).

VITALS

Blood vitals report is similar to getting blood work done. It covers a range of blood measurements. This report shows each category as low, normal, or high.

Chakra vitals report shows if your chakra centers are off balance. The report shows either low (underactive or cool), normal (balanced), or high (overactive or hot).

Gastrointestinal Functions shows the balances or imbalances of the GI system. The report shows either low, normal, or high.

Meridian vitals report shows the imbalances with the 12 Meridian lines. Meridian lines are energy lines that can be low (blue), normal (green), or high (red) functioning.

Nutritional Analysis shows as normal or deficient and measures different minerals, vitamins, amino acids, and enzymes.

Physical Functionality shows as low, normal, or high and shows basic physical ability, bone, muscle, brain and cardiovascular health, as well as hormone, immunity, and organ health.

Toxicities shows as positive or negative and reports on allergy, bacterial, fungus, heavy metals, and man-made toxins.

COMPREHENSIVE

The comprehensive reports show as a number 1-9.
The number 5 is optimal or healthy, 1 represents underactive
and 9 shows as overactive or stressed.

Organs and cells – Cover the cerebral cortex, brain sagittal, pancreas, prostate, liver, kidneys, lungs, blood, meninges, adrenal, cells, digestive, skin, thyroid, gastrointestinal, chromosomes, basal ganglia, breasts, female sagittal, mitochondria, rectum, reproductive, stomach and urinary.

Veins – Covers the head, upper body, lower body, arms and legs.

Skeletal – Covers the skull, teeth, spine, ribs, arms, legs, pelvis, hands and feet.

Nerves – Covers the brain, head, upper body, lower body, legs, and arms.

Connective tissues – Covers the spine, eyes, hips, shoulders, elbows, feet, and knees.

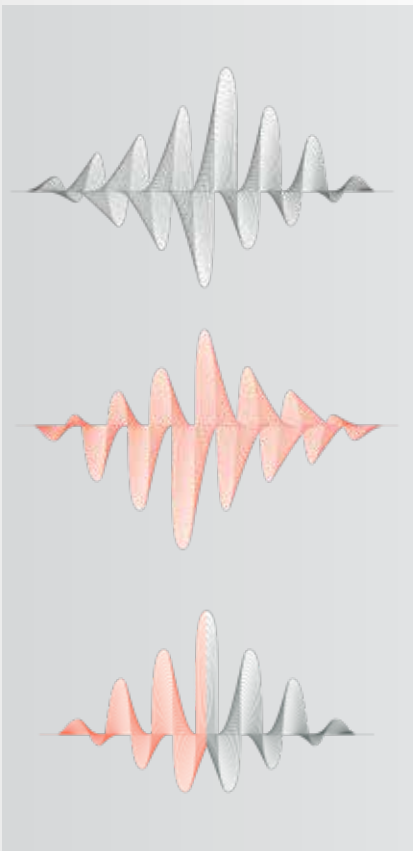

Body Parts – Covers the muscles, head, arms, legs, hips, torso, neck, heart, ears, and lymphatic system.

Arteries – Covers the head, arms, upper body, lower body and the legs.

Frequency Optimization

Before we can cover how frequency optimization works, we need to think about frequencies. Frequencies are measurements at which something occurs, a wave. In order to optimize a frequency, we need two waves that are identical and yet opposite, and at an 180° angle from each other. Then these two waves cancel each other out. The AO Scan evaluates which frequencies collected from the scan on the user are out of balance with the database of ideal and healthy body frequencies, then it generates a frequency opposite to the ones that are not ideal. Which then allows for optimal frequency suggestions in the form of binaural beats.

The black wave to the left represents a detected frequency that is not in balance with the AO Scan database of ideal and optimal body frequencies.

The red wave to the left represents an AO Scan generated frequency that has the same phases and peaks as the black wave above, yet it has a 180° rotation to the black wave.

When the two same yet opposite waves are introduced the result is a cancellation and neither wave exists any longer.

S.E.F.I.

Studies done by Nikola Tesla brought about the Single Rad, this program allows the use of Scalar Wave Technology to convert simple affirmations into a complex series of frequencies that can be broadcasted directly to an individual or object.

Zero-point energy (ZPE) or ground state energy is the lowest possible energy that a quantum mechanical system may have.

How it works:

There are two categories: Quantum Reach, and Quantum Frequency.

Each category has a dropdown menu that allows the user to select a desired affirmation that is to be imprinted into an object.

When imprinting into an object it is best to use the ZPE function which is operated by pressing the erase button.

The fractal amplifiers work to enhance and focus the frequencies in or out of the object.

The S.E.F.I. or Subtle Energy Frequency Imprinter uses Scalar Wave Technology and Zero-point Energy to erase or program frequencies into an object.

COMING SOON...

Thermal View - The AO Scan Thermal Pro Imaging Camera uses the latest technology of thermal imaging cores to improve clarity, and is equipped with advanced image processing technology to create pictures from heat.

AO Scan thermal imaging is a comfortable non-invasive procedure that detects the thermal emissions of the body's physiology.

You may have noticed a few greyed out options on your AO Scanner Mobile Device. Thank you for your patience as we develop these new features.

Also Coming Soon...

Quick Scan - Will open up a range of new functions.
