# PROGRAM DETAILS

## 1. INNER VOICE

Place yourself in a closed and quiet room.

TAP the activate bar and begin speaking your ABC's (Alphabet Song):

At the end of Z, ask "what AOScan can do for me?"

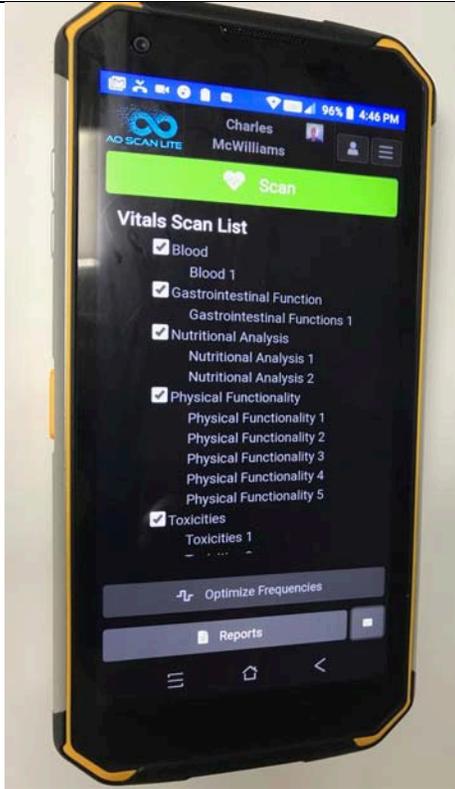

You will see your voice analysis load into the bar graph. Note your low and high notes.

Now, review the Report and it will show you the Colors you should be wearing with your Light Wave Optical colored glasses as an energy tonic and balancer daily. You should wear each balancing color your report generates at least 15 minutes daily.

It will calm your nerves and help you sleep soundly.

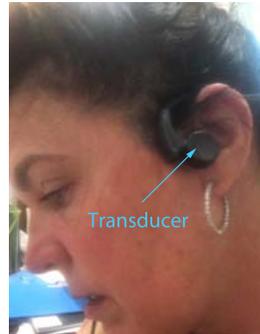

## 2. VITALS

The Vital Scan mode of the device performs a complete scan of over one hundred functions of the body and completes this scan in under 1 minute while producing the data to produce your clients with a 24 page detailed report to take home!

Seat yourself comfortably and use the special transducer headphones, placed anterior to your ear, on your jaw joint area.

Tap on **SCAN**.

In 30 seconds your entire body frequencies for vital functions are scanned and analyzed.

Tap and report to view results. Tap on the mailbox to send to recipient.

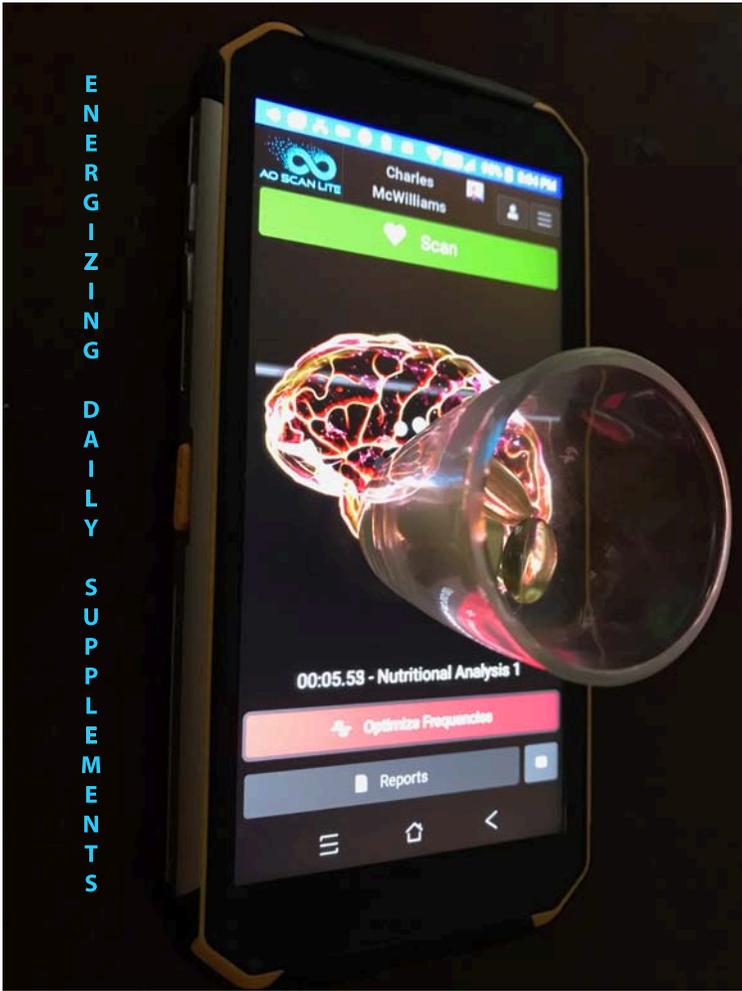

### **Frequency Optimization**

This function of the system evaluates every scan and determines what custom series of corrective frequencies that get sent to the brain helping encourage the body to *self correct* issues that are not in the optimum range through a process known as Sympathetic Vibration.

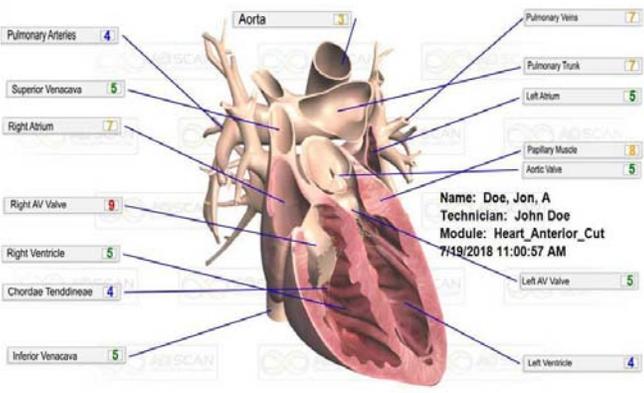

Tap on "Optimize Frequencies" to initiate treatment balancing.

While you are balancing, your daily water bottle, vitamins and supplements, essential oil, or bracelet can be placed flat on the screen and simultaneously charged!

### 3. COMPREHENSIVE

|  |  |
|--|--|
|  | <p>This Comprehensive Scan mode performs an even more detailed scans on over 130 organs, cell, bones and chromosomes throughout the body as it prepares for client an in depth graphical report. Each of these scans only take between 12 and 20 seconds each. This mode also offers a comprehensive library of information that is constantly being up graded with more information on a regular basis.</p> <p>Frequency Optimization<br/>Again, TAP on this bar and corrective frequencies will be sent through your transducers to <i>self correct</i> vital organ functions.</p> |

### 4. S.E.F.I.

|   |   |
|---|---|
|  | <p>The Subtle Energy Frequency Imprinter (S.E.F.I.) comes with a set of 12 programs that give you the ability to imprint frequencies into a target object such as a sugar pill, tincture, bracelet etc.</p> <p>Principle</p> <p>The principle behind the S.E.F.I. is similar to making a homeopathic remedy. A homeopathic remedy has a trace amount of an herb or medicine added to a liquid, but is then shaken 10 or more times to release its scalar potential. This new dilution goes through the same, successive processes 10 to 30 more times to form the finished, energetic product.</p> <p>The finished product has been diluted to the point that the herb or medicine can no longer be detected in the liquid, but energy field of the herb or medicine highly concentrated in the liquid. This finished homeopathic remedy is now transformed into a more powerful and effective remedy than the original herb or medicine for those so sensitized.</p> <p>The S.E.F.I. produces an energetic remedy not by dilution but through creating a series of Zero Point Bursts (ZPB) of energy. Thousands of ZPB's per second for up to 120 seconds. These 'bursts' simulate the shaking of dilutions to make traditional, homeopathic remedies.</p> |

## Zero Point Energy

Zero point Energy is the domain of cosmic energy beyond the electromagnetic spectrum. It is often referred to as *scalar*, a physical quantity that is completely described by its magnitude. Scalar Energy is created when two identical frequencies that come from opposite directions meet, a cancellation of the free movement takes place creating a stationary energy field that is electrostatic. Scalar Energy cannot be measured by contemporary frequency instruments as it is depicted to be without frequency.

Scalar waves are also referred to as Tesla Waves or Longitudinal Waves are capable of penetrating any solid object including buildings. A transmitter can be placed in a box of thick metal and a receiver outside of the box will still receive the scalar wave. Scalar waves are capable of passing through the earth from one side to another with no loss of field strength as Tesla showed in one of his experiments. Scalar waves travel on a medium called 'aether', a plenum of ultrafine particles described by Maxwell as "molecular vortices."

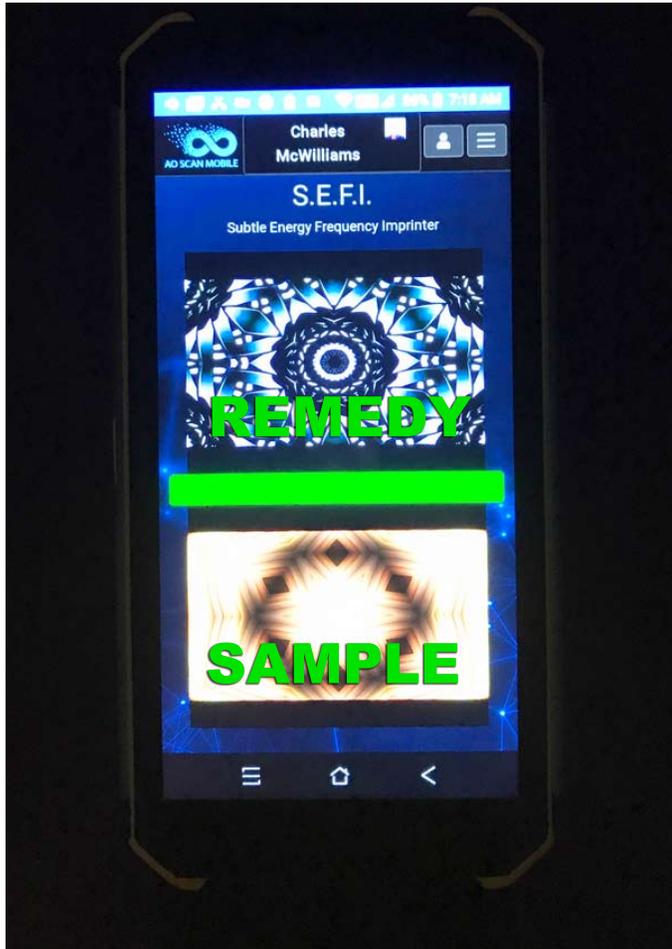

Traveling faster than the speed of light (superluminal), Scalar Waves are not electromagnetic but considered a pure zero point energy. They also have the potential to be used as a power source which Tesla demonstrated at Niagra Falls when he lit the world up with lighting.

So Scalar Waves can be used for communication, energy, and other applications. Scalar Waves (longitudinal waves) do what Transverse waves cannot. They are fast, penetrating, connected, and can broadcast magnified power. Their potential is almost limitless. It is even said that it is the technology that Extra Terrestrials use!

SEFI makes a Zero Point Burst (ZPB) is when 2 identical frequencies waves are played together with one of the frequencies at 180 degrees out of phase with the other one. When these 2 waves hit each other, they create what is called a Zero Point Burst and that produces a powerful burst of energy that is captured with the target remedy product, water, sugar pills, or energy bracelet.

# IMPRINTING

S.E.F.I.

Imprinting is the modernized form of homeopathic potentization. By this method, soft electrons are captured off by the Zero Point Burst and targeted to a receiver, notably water and organic materials like gemstones, rare earth materials, sugar pilules, etc.

In our school of homeopathy, the more energetic force is exerted, the stronger the remedy, what we call POTENCY.

In old school homeopathy, soft electron extraction took place by violent shaking of a liquid in a container, and was based on the number of shocking "succussions". The more up-and-down succussions, the higher the Potency of the original produced.

In energetic potentization, it is determined by TIME. The longer the 'remedy' is exposed to the energetic field, the more saturation of the compound is achieved, and thus, the higher the potency.

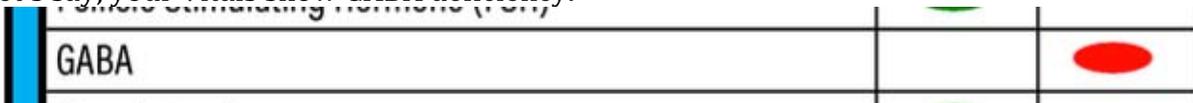

With SEFI, the minimum time to make a low potency remedy is 2-3 minutes.

Place the SAMPLE to be duplicated, on the LOWER window, and the REMEDY on the UPPER window, TAP Start bar.

Watch your timer and make the potency desired.

## Examples

Let's say, your Vitals show GABA deficiency.

*gamma-Aminobutyric acid, or  $\gamma$ -aminobutyric acid, or GABA, is the chief inhibitory neurotransmitter in the developmentally mature mammalian central nervous system. Its principal role is reducing neuronal excitability throughout the nervous system. GABA is sold as a dietary supplement.*

So this means you are probably in an excitable state, nervous, anxious, and probably having sleep disturbance. Extreme GABA deficiency leads to seizures as in epilepsy.

So, you take one tablet of GABA in the upper window, and a glass of water or bracelet in the lower window, and START.

Generally, to potentiate supplements, you start with low potency, like 3 minutes (6X in homeopathic parlance), take that potency for a few days, then move up to 12C for a few days, then 30C, and so on until the bottle of supplements is finished. By then you should notice dramatic improvements! The POTENCY potentiates the SUPPLEMENT.

### **Does the potency obviate need for the Supplement?**

Generally, NO.

The physical substance is part of living, the energetic supports the physical, and vice versa. Just prayer with meals, the remedy potentiates the power, absorption, and metabolism of the supplement.

However, if the body actually produces the substance, like GABA naturally, at some point you will not need supplementation as the energetic imprint will 'kick-start' your own metabolic functions. This can only be determined on a case-by-case basis and every individual is unique, one size does not fit all.

### **Can I imprint more than one remedy into the same substance ?**

YES. The aethers in the scalar domain is exceedingly rich in frequencies. Just as the airwaves of planet earth readily transmit simultaneously television (UHF), radio (AM/FM), and cellphones (microwave), the scalar domain is even more rich.

You can imprint as many energies into water, sugar pilules, and organics as you want. The idea, however, is more is not necessarily better in terms of supplementation. You can over-dose. As a general rule, most homeopaths do not use more than seven (7) remedies at one time. After all you do want to sort out what is working for you, and the need to take increasing potencies to 'kick-start' your normal body energy.

# THE TINCTURE OF TIME

## IMPRINTING

### THE TINCTURE OF TIME

Homeopathic and energetic remedies are methods of structuring WATER, while filling in the atomic spaces with soft-electrons.

The above timer can be used to time your saturation while imprinting.

In homeopathy, potency determines strength of compound coupled with duration (time) of action. The higher the potency, the stronger the product, energetically speaking, and the longer the remedy will act. Low potencies are used for acute conditions, middle range potencies for those nagging complaints, and high potencies for chronic conditions.

For more information, you can make a study of homeopathic principles.
